Letter of Reference for the Founders of RS Welding

We highly recommend collaborating with Sebastian and Kamil, who have carried out specialized welding and installation tasks for us.

As Kroll Cranes, a company specializing in the design and manufacture of the world's largest heavy construction cranes, we hold our contractors to the highest possible standards. Working on large-scale structures subjected to extreme dynamic loads requires absolute precision, excellent technological knowledge, and an uncompromising approach to quality control. Sebastian and Kamil have repeatedly demonstrated that they possess outstanding skills and technical expertise, enabling them to successfully execute such critical structural tasks.

Their total commitment, punctuality, and professionalism allow us to wholeheartedly recommend their new venture—RS Welding. They are a partner that guarantees the highest quality of execution wherever the strength, precision, and safety of steel structures are paramount.
